

**Faculty Mentors in Four Locations:**

Molloy College, Long Island

Brooklyn College, CUNY

LIU-Downtown Brooklyn

Graduate Center, CUNY, Manhattan

**Mentors' Areas of Research:**

Phonology

Syntax

Semantics

Computational Linguistics

1st and 2<sup>nd</sup> Language Acquisition

Audiology

Developmental and Acquired Speech-

Language-Hearing-Communication

Disorders

Sociolinguistics

Language Contact and Variation

Bi- and Multilingualism

**Director: Prof. Isabelle Barrière, PhD**

*Molloy College*

**Co-Director: Prof. Jonathan Nissenbaum, PhD**

*Brooklyn College, CUNY*

**Program Coordinator: Cass Lowry, MA,**

*The Graduate Center, CUNY*

## Detailed Overview

The *REU Site Intersection of Linguistics, Language and Culture Program* recruits talented undergraduate students residing in the NY area from (but not limited to) historically disadvantaged groups to partake in a part-time year-long program to engage in research on language and participate in workshops promoting diverse science and preparing for graduate school.

Through funding from the National Science Foundation (NSF) and the US Department of Defense Scientific Research (AFSOR) program, 18 students will be selected to engage in a year-long research experience in speech-language-communication-hearing sciences that will include:

- A. Establishing a community of scholars by attending academic presentations in your interest area and writing about your work in a program-internal blog
- B. Conducting a research project with the help of a Research Mentor (a professor from a local university)
- C. Training in research ethics in order to conduct research involving the participation of human subjects
- D. Participation in workshops on preparing for and applying to graduate school (covering topics such as: taking the GRE, selecting a graduate program, and compiling a successful application)
- E. Organizing the annual ILLC summer conference for the NSF REU site participants and community partners
- F. Presenting research project and findings at the ILLC conference

## *What?*

Complete a language-science research project guided by a Professor-Mentor and attend workshops on promoting diverse science and applying to graduate school.

## *When?*

1 week summer session August 2022

12 weeks, 6-8 hours per week in both Fall 22 and Spring 23

1 week summer session June 2023

REU Student Fellows are awarded a **stipend of \$5,200** for participation in the program to compensate for their work.

## **Deadline to Apply:**

**March 31, 2022**

## **Apply online at:**
